

Electric Vehicle 100Amp Receptacle Kit

ETEC's Electric Vehicle (EV) 100Amp Receptacle Kit provides all the major vehicle components required to conveniently set your EV up to plug into the ETEC LSV-100 EV Opportunity Charger. Once your EV is setup to charge on the LSV-100, you will be able to refuel your EV in minutes instead of hours. This allows better utilization of your EV and can extend battery life when properly applied in your fleet operation.

The EV 100Amp Receptacle Kit includes a 100Amp BIW/ITT Cannon 9-Pin receptacle, receptacle guide and bezel, a temperature sensor for proper charging, and a power contactor to eliminate the chance of a "drive-off" scenario while plugged into the charger and to isolate the pins from the main battery pack while not charging. Installation is simple and fast, in most cases taking less than two hours to complete.

LSV-100 EV Opportunity Charger

KIT INCLUDES

For Carts use Part #EVKIT-100
For GEMs use Part #GEMKit-100

- BIW/ITT Cannon 100Amp, 9-Pin Charge Receptacle
- Receptacle Guide & Bezel
- Charger Temperature Sensor
